# Apollo's Innovation in Pathology

- Apollo's Enterprise Imaging solution, **arccClinical**, includes a focused workflow solution for Pathology. It is not just a departmental or device associated image management solution but can be utilized for any clinical workflow to acquire, manage, and store both non-DICOM and DICOM images.

- Apollo **arcc** enables device acquisition flexibility. **arcc** is vendor agnostic and works all major whole slide image scanners, microscope cameras, grossing cameras, electron microscopes, autopsy cameras, and many other laboratory imaging devices such as Faxitron, Immunofluorescence, flow cytometry.

- **arcc** enables multi-specialty collaboration. Apollo's enterprise viewer can display WSI Images, videos, DICOM radiology images, photos and more, side by side with the tools that are appropriate to each image modality.

- Apollo **arcc** has the ability to provide workflows for Peer Review, Tumor boards, Virtual conferences and grand rounds.

- Apollo supports the education mission of your organization. **arccClinical** can be organized by diagnosis with all associated image modalities (WSI, DICOM, etc.) in one place with a single viewer, audited access, relevant clinical training notes and secure access.

- Apollo supports the research mission of your organization. **arccClinical** can be organized by research project with user defined datasets that contain all associated image modalities (WSI, DICOM, etc.) in one place with; a single viewer, audited access, metadata for project, relevant research notes and secure access that can be restricted toa principal investigator and team. Apollo will track cohort participants by IRB number within the system.

- Apollo **arcc**'s security goes beyond HIPAA and meets chain of custody evidentiary requirements for forensic autopsy images. **arcc** allows for role-based access to the image level with a comprehensive audit ability.

- Apollo has business analytics capabilities built into **arccCore** which enable the monitoring of images and data stored and managed within the platform, including storage, a concern for managing large WSI files.

- Apollo partners with our customers to provide innovation and development to meet the needs of the customers.
