**API Budget (FY11/2011)**

**REVENUE**

- Membership Fees
  - Individual Regular (FY11) $140.55
  - Individual Regular (FY12) $144.00
  - Sustaining (FY11) $225
  - Sustaining (FY12) $235
- Teaching/Professional Development (FY12 $15,300)
- Institutional Organizations (FY12) $50,350
- Corporate FY11 ($1,500)
- Associate FY11 ($1,000)
- (Prior to JNCES educational grant)
- **Total Membership Revenue** $45,676.00

**EXPENSES**

- Professional Fees
  - Legal $20,200
  - Accounting $30,400
  - Web Services $2,600
  - Bank and Credit Card Service Fee $1,101.02
- **Total Expenses** $54,065.73

**Net Operating Gain/Loss** $28,429.28

**Fiscal Year Starting Fund Balance** $28,098.00

**Fiscal Year ending Fund balance** $66,130.58

**Association for Pathology Informatics** (API) Annual Report 2010–2011

The Association for Pathology Informatics (API) was founded in 2002 by a group of pathologists interested in defining pathology informatics as a clinical subspecialty within pathology by way of education. API continues to support this educational mission by:

1. Sponsoring a national educational meeting.
2. Providing educational content to other pathology meetings (e.g., United States and Canada Academy of Pathology annual meeting).
3. Developing and educating members about standards for reporting, transferring, and storing pathology-related information.

API has also developed an open-access journal, *Journal of Pathology Informatics (JPI)*, which is available for viewing at jpathinformatics.org. The journal is indexed in PubMed; and API has sponsored pathology resident travel awards to the APIII and Lab InfoTech Summit meetings in order to foster interest in pathology informatics as a discipline among pathology trainees.

**API’s Mission**

API’s mission is to advance pathology informatics and promote the highest standards of information and data exchange for clinical practice and research. This is achieved by:

1. Advocating for and developing standards, guidelines, and best practices in pathology informatics.
2. Educating and advocating for the participation of pathology departments in pathology informatics.
3. Supporting and promoting the integration of pathology informatics into the practice of pathology.

**API’s Governance**

The Association is governed by a Board of Directors, which includes the President, President-elect, Vice President, Secretary, Treasurer, Editor-in-Chief, and six other members. The Board meets quarterly to discuss the strategic direction of the organization and to oversee the operations of the Association.

**API’s Finance**

API’s financial resources come from membership dues, meeting registrations, and other sources. The Association operates on a not-for-profit basis, with any surplus funds being reinvested in the Association’s activities.

**API’s Publications**

API publishes *Journal of Pathology Informatics* (JPI), which is a peer-reviewed journal that focuses on the latest developments in pathology informatics. The journal is available online at jpathinformatics.org.

**API’s Conferences**

API hosts annual meetings, including the Association for Pathology Informatics (API) Annual Meeting, which provides a platform for the exchange of ideas and the latest developments in pathology informatics.

**API’s Impact**

Through its meetings, publications, and educational programs, API has made a significant impact on the field of pathology informatics, helping to advance the specialty and improve patient care.
The Association for Pathology Informatics has taken the lead in addressing curriculum needs through the creation of its membership-based training program. This collaborative management strategy, involving representatives of world-class informatics programs and training support program members, is designed to provide residency programs with the essential training needed for pathologists. It is part of the national meeting, organized by the National Conference of Pathologists of the United States, 2003-2009.
